REMARKS

Reconsideration of the instant application is requested in view of the foregoing amendments and the following remarks. Claims 1-10 are pending in the application with claims 1, 4, 5, and 9 having been amended herein. The Examiner is thanked for indicating that claims 4 and 5 contain allowable subject matter.

Independent claims 1 and 9 have been amended to recite in pertinent part that at least one of the plurality of networks includes high speed transmission lines and to recite:

a control unit transmitting switching information only via the at least one network having higher speed transmission lines and at least one higher speed input unit when trouble occurs in the transmission lines shared by said plurality of networks

It is respectfully submitted that the relied upon portions of the cited references do not teach the routing of the switching information only via the higher speed transmission lines when trouble occurs. Accordingly, it is submitted that independent claims 1 and 9 patentably
